Which modes of transport could the automated shuttle bus replace? (n=51)

Which modes of transport the automated shuttle replaced this time? (n=50)

Note: Respondents were allowed to select multiple alternatives. Number of respondents was 51. There is no metro service in Tallinn.

Questions and comments

Dynamic routing or on-demand service would be nice.

More technical capability needed to independently participate in traffic.

The bus drives too slow and brakes too hard!

Seats could face travel direction.

Amazing experience, thank you!

Ventilation and suspension need improvements.

More routes in Tallinn and bigger buses!

Schedules were hard to find.

Very good for this development stage, very promising!
